Join us for the "Hydrogen Horizons" summer school from August 12-16, 2024, where we delve into the dynamic world of hydrogen markets. This intensive program will cover critical aspects of hydrogen storage, demand, supply, and transport. The sessions will provide in-depth insights, cutting-edge research, and practical solutions, including developing market-oriented solutions, to deal with current challenges.

Don't miss this opportunity to engage with experts, network with peers, and expand your knowledge in the rapidly evolving hydrogen sector.

To ensure continuity in the collaboration between the partner universities from Morocco, Egypt and Germany, a series of winter/summer schools and workshops will be hosted in Rabat, Cairo and Cologne during the project's funding period until end of 2026.

Students from the University of Cologne who will attend the summer school in Cologne will be given priority to participate in the winter school in Rabat 2024.

Deadline for application: July 22nd, 2024
